Martincsek Levente

Summary

As a front-end developer with 2+ years of experience, I confidently work both in a team and independently. I enjoy working with new technologies and continuously improving my professional skills. In my free time I like to develop React projects and create interesting web components.

Work Experience

Full-stack Software Engineer	Gerhardt Informatics Szeged, Hungary	2022 - 2025
<ul style="list-style-type: none">• Collaborated with multiple Agile teams to develop and maintain enterprise applications for the German company Brückner.• Specialized in Frontend development, leveraging expertise in Angular and custom UI components.• Developed custom web components in Angular with D3.js and Angular Material, improving data visualization performance.• Enhanced backend functionality by implementing Java and Kotlin services.• Built test automation frameworks with Playwright, improving testing efficiency.• I also wrote Python scripts for various tasks.• Working on projects of different sizes helped me adapt effectively to diverse development processes and requirements.• Completed an Agile software development training in Munich.• Practiced Clean Code principles, ensuring maintainable and scalable solutions.
